**Re: Township of Lyndhurst – Passaic River Mile 10.9 Sediment Removal Action
Riverside County Park
CERCLA Docket No. 02-2007-2009
Our File No. 41029.4000**

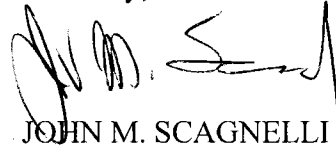

Dear Bill:

We represent the Township of Lyndhurst ("Township"). On February 1, 2013, I sent you a letter enclosing Neglia Engineering's Final Proposal for the backflow preventers to be installed on the storm drain outlets along the Passaic River bank around Riverside County Park. The revised estimated cost for the project is \$146,200.

It was our understanding that you would discuss the estimate with the CPG members at the February CPG meeting and let us know whether they are willing to make a one time "cash out" payment to the Township in that amount for the backflow preventers. The Township would like to know whether CPG will pay for the backflow preventers as soon as possible, since the sediment removal action work is starting within the next few months, the backflow preventers need to be installed prior to the start of the work.

We look forward to hearing from you.

Sincerely,

JOHN M. SCAGNELLI
